

MAHELARECEN

PROGRAMS TO BE APPLIED IN THE YEAR 2011

During this year we have started our Health Education activities regarding Nutritional Deficiency and pure Drinking water subjects to the educational institutions (schools, colleges) industrial peoples and public.

And during this year we also covering near by district of Dindigul, from Dindigul district we have selected Koombur block which is near by Gujiliambarai, under this block more than 20 villages. It contains population of 10000 in that area. We covered 4 villages and we are detecting leprosy cases among those villages. We distribute medicines to the patients. We have examined school children to detect skin complaints and early leprosy cases.
